Software Developer | Computer Science Engineering Graduate (2026)

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with hands-on full-stack experience: REST APIs and backend services with Python/FastAPI, OOP fundamentals in Java, and interfaces with HTML, CSS, JavaScript, and React. Designed, built, and deployed a full-stack multimodal deep learning application end to end, and builds practical automation (n8n) and multi-agent AI systems (Google ADK) – all documented on public GitHub repositories. Seeking an entry-level Software Developer role.

TECHNICAL SKILLS

Languages: Python, Java (OOP Fundamentals), JavaScript

Frontend: HTML, CSS, React.js

Backend & AI/ML: FastAPI, REST API Design, PyTorch, Hugging Face Transformers (BERT, HuBERT/Wav2Vec 2.0), MediaPipe, OpenCV, Google ADK

Database & Tools: MySQL, SQLite, Git, GitHub, Docker, WebSockets, n8n (Workflow Automation)

PROJECTS

Sentinel Interface – Multisource Emotion Recognition System

Academic Project

Core Tech: FastAPI, PyTorch, Transformers (BERT/HuBERT), MediaPipe, WebSockets, SQLite, Docker

Live: r-vasanthkumar73-dev-sentinel-multimodal-emotion-ai.hf.space

- Built a real-time platform fusing 3 modalities – computer vision (468-point facial landmarks + PyTorch CNN), speech emotion recognition (HuBERT/Wav2Vec 2.0), and text sentiment analysis (BERT) – over asynchronous WebSockets, with a FastAPI/SQLite backend.
- Containerized with Docker and deployed live on Hugging Face Spaces, with Chart.js analytics dashboards built on logged session data.

Eco-Agent – Multi-Agent Sustainability Assistant

Google & Kaggle Program

Core Tech: Python, Google ADK, Gemini API, FastAPI

Repo: github.com/rvasanthkumar73-dev/eco-agent

- Built during Google & Kaggle's 5-Day AI Agents Intensive: a multi-agent system (Google ADK) with a security-checkpoint pipeline (human-in-the-loop approval, PII redaction, prompt-injection defense); recorded a YouTube walkthrough and submitted to the *Agents for Good* track.

n8n Workflow Automation Systems

Self-Initiated Project

Core Tech: n8n, Google Gemini API, Telegram Bot API, Email/SMTp

Repos: github.com/rvasanthkumar73-dev/n8n-tech-news-automation,
github.com/rvasanthkumar73-dev/Smart-Weather-Alerting-System

- Built two self-hosted n8n pipelines: an AI news-briefing system (Gemini-summarized, delivered via Telegram/email) used live while presenting at Bank of America, and a weather-alerting system with threshold logic, documented with Mermaid-diagram READMEs.

EXPERIENCE

Full Stack Development Intern

Remote

NoviTech R&D Pvt Ltd

Jun – Jul 2025

- Worked across the full-stack development workflow (HTML, CSS, JavaScript) on a small project build under mentorship, gaining remote team collaboration experience.

5-Week Tech and Soft Skills Training Program

Chennai

Bank of America (BA Continuum India), Taramani

Jun – Jul 2026

- Delivered a technical presentation, “Tools Leveraged in Our Day-to-Day Life,” extending an allotted 10-minute session to 19 minutes based on mentor engagement and positive feedback.

EDUCATION

Global Institute of Engineering and Technology

Ranipet

BE – Computer Science and Engineering (CGPA: 8.33)

2022 – 2026

Vellore Computer Training Centre (VCTC)

Vellore

PGDCA – Grade: A

2017

CERTIFICATIONS & TRAINING

- **Database Management Systems** | NPTEL (SWAYAM) – Elite Certificate
- **Advanced Frontend Development Course** | Anudip Foundation – 3-Month Program, Jan–Mar 2026
- **Automate Everything With n8n** | LetsUpgrade in collaboration with NSDC
- **Claude and Claude Code 101** | Anthropic
- **Java Fundamentals** | L&T EduTech
- **n8n 90-Day Automation Challenge** | TuteDude – *In Progress* | **Oracle Agentic AI Foundations Associate** – *In Progress*
