Portfolio: <https://vasanth-kumar-portfolio-sooty.vercel.app/>
Aspiring Full stack Developer | Computer Science Undergraduate

PROFESSIONAL SUMMARY

Computer Science undergraduate with basic knowledge of HTML, CSS, JavaScript, and Java fundamentals. Completed a one-month Full Stack Development internship and certified in DBMS (NPTEL) and Java fundamentals (L&T EduTech). Actively learning backend development. Seeking an entry-level developer role to build practical skills.

TECHNICAL SKILLS

Programming Languages: Java (Fundamentals), JavaScript, PHP, python

Web Technologies: HTML, CSS, React.js

Database: DBMS concepts, MySQL

Tools: Git, GitHub, n8n (Workflow Automation)

INTERNSHIP EXPERIENCE

Full Stack Development Intern

NoviTech R&D Pvt Ltd (Remote)

- Learned basics of full stack web development
- Worked with HTML, CSS, JavaScript, and basic backend concepts
- Gained exposure to project development workflow and teamwork

EDUCATION

Global Institute of Engineering and Technology

BE - Computer Science and Engineering (CGPA: 8.33)

Ranipet

2022-2026

Vellore Computer Training Canter (VCTC)

PGDCA (Post Graduate Diploma in Computer Applications) – Grade: A

Vellore

2017

CERTIFICATIONS

- Advanced Frontend Development course | Anudip Foundation | [Jan 2026 - March 2026]
- Database Management Systems - NPTEL (SWAYAM) | Elite Certificate
- Java Fundamentals - L&T EduTech
- Automate Everything With n8n | LetsUpgrade in collaboration with NSDC
- Claude and ClaudeCode 101 | Anthropic

PROJECTS

Multisource Emotion Recognition System

Core Tech: FastAPI, PyTorch, Transformers (BERT/HuBERT), MediaPipe, OpenCV, WebSockets, SQLite, Chart.js, Docker, Hugging Face Spaces

Project Platform Link: [<https://r-vasanthkumar73-dev-sentinel-multimodal-emotion-ai.hf.space>]

- Developed a real-time multimodal deep learning platform that fuses computer vision pipelines (MediaPipe 468 landmarks & PyTorch CNN), acoustic processing frameworks (HuBERT/Wav2Vec 2.0), and text sentiment transformers (BERT) over asynchronous WebSockets.
- Manages low-latency relational session logs using an ACID-compliant SQLite database, allowing instructors to track historical engagement trends via Chart.js and export cross-timezone accurate analytics to CSV format.

Omni- Trace| Universal Sustainability Tracker

Core Tech: HTML, CSS, JavaScript, Chart.js, LocalStorage

Project Platform Link:

[<https://vasanthkumar73.neocities.org/Omni-Trace:UniversalSustainabilityTracker/vasanth-index>]

- A web-based carbon accounting tool that uses real-time JavaScript calculations and Chart.js visualizations to help users monitor their daily environmental impact.
- Features include persistent audit history via LocalStorage and comparative benchmarking against global averages.
